

WHY DIY RODENT POISON CAN CREATE BIGGER PROBLEMS

904-746-2929

HUMANE SOLUTIONS.
LASTING RESULTS.

✗ THE PROBLEMS DIY POISON CAN CAUSE

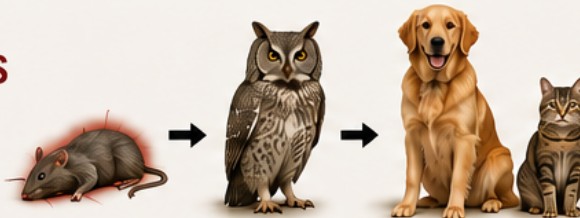

DEAD ANIMALS IN WALLS

Rodents often die in hidden areas like walls, ceilings, or under flooring. The result: foul odors, stains, flies, and even structural damage.

SECONDARY POISONING RISKS

Poisoned rodents can be eaten by pets, wildlife, or birds of prey—passing the poison up the food chain. This can cause illness or death to other animals.

Poison doesn't just affect rodents. It can harm other animals too.

DIY POISON = MORE RISKS, MORE PROBLEMS

Foul odors

Stains & damage

Flies & pests

Risk to pets & wildlife

More cleanup & repair costs

VS.

SMART CHOICE = SAFE, EFFECTIVE, LASTING
